Dear Valued and Future Customer,

I would like to thank all of you for your continued support. I am proud to present our newest catalog, our most comprehensive and wide-ranging ever.

This is an exciting time in our industry. As the wireless infrastructure industry transitions from coax to fiber, Valmont Site Pro 1 is here to support you. We have added accessories to help you in supporting, organizing, sealing, and terminating fiber and hybrid cables. Another exciting addition is our introduction of lightweight mounts aimed at many of today's smaller sites. Additionally, some older, popular Microflect and Pirod parts have been brought back due to popular demand.

I am also excited to announce the opening of our sixth and newest U.S. Distribution facility in Carrollton, Texas. With the addition of this distribution facility, we now ship to almost the entire country in 1 to 2 days. As always, our six facilities are fully stocked and ready to meet your needs in whatever market you are operating in.

Valmont Site Pro 1 has proven over the last year why we are the number one choice in wire less components. We shipped over 35,000 orders in 2010. Incredibly, 99.5% were shipped without any mistakes and 95% shipped without a backorder and on-time. I do not believe any other company can approach this level of customer service. Never satisfied, we continue to make every effort to improve on these outstanding numbers.

I look forward to filling your future requirements and am confident you will be a satisfied customer. If for any reason you are not 100% satisfied with our products or service, I personally want to hear from you. My mobile phone number is 631-662-0968. Is the General Manager of your current supplier willing to give you their personal phone number?

Sincerely,

Joseph Catapano
